Internship Objective

- Completed a 6 month **internship at CIII**, working with Javascript , PHP and SQL on Web development Projects.
- Contributed to developing responsive web applications and improving functionality through frontend and database integration.
- Worked on a live **Online Medicine Ordering System** and contributed to web application development.

Technical Skills

- **Frontend:** HTML, CSS, JavaScript, JQuery , Angular , Bootstrap , Three.JS , GSAP
- **Backend:** PHP , PYTHON
- **Database:** SQL , MySQL
- **Tools & Others:** GitHub Copilot, OpenAI Codex, ChatGPT, AI-assisted debugging & development VS Code, GitHub, Cursor AI ,WordPress.

Projects

- **Autism Detection System (JavaScript, Python, AI/ML)**
Developed an AI-powered autism detection system that analyzes uploaded images and predicts the likelihood of autism-related indicators using machine learning models. Built the interface using JavaScript and integrated it with a Python-based AI/ML backend for image processing and prediction.
Result: Gained practical experience in machine learning, image classification, model integration, and full-stack AI application development.
- **Solar System Simulation (Three.js + JavaScript)**
Created an interactive 3D Solar System with planetary motion and animations using Three.js.

Result: Improved understanding of 3D graphics, animations, and interactive web visualization.

➤ **Wizard Form (PHP + SQL + Supabase)**

Multi-step form with sections for profile, personal, academic, and document uploads. Data stored using PHP (SQL operations: INSERT, SELECT) and experimented with Supabase API integration.

Result: Practical understanding of SQL queries and PHP backend basics.

➤ **E-Commerce Shoe Website (HTM + CSS + JavaScript + PHP + SQL + GSAP)**

Developed a modern e-commerce shoe website featuring product listings, dynamic product detail pages, size selection, quantity management, and cart interactions. Used GitHub Copilot and ChatGPT for faster UI development, debugging, and backend integration.

Result: Gained hands-on experience in DOM manipulation, state handling, animations, browser history API, and building real-world interactive user flows.

➤ **Countries API Project (HTML + CSS + JS)**

Fetches and displays country data via API calls; dynamically generated flag cards using JavaScript.

Result: Understood API calls, JSON handling, and DOM rendering.

Certifications

➤ **JavaScript (Basic)** – HackerRank (2025)

➤ **SQL (Basic)** – HackerRank (2025)

(<https://www.hackerrank.com/certificates/e7c19c8f326d>)

Education

➤ **Graduation (B.Tech, Computer Science)** – 2022–2026 | 8.0 CGPA

GH Rasoni University, Nagpur

➤ **HSC (12th Grade, Science)** – 2022 | 77.6%

Radha Mahavidyalaya, Nagpur

➤ **SSC (10th Grade)** – 2020 | 70%

Kendriya Vidyalaya, Ajni, Nagpur

Languages Known

➤ English (Fluent) , Hindi (Fluent) , Marathi (Native)
