OBJECTIVE

Aspiring Full Stack Developer with hands-on experience in building interactive web applications using JavaScript, PHP, and modern frontend libraries. Passionate about creating user-friendly digital experiences and eager to contribute to real-world projects through an internship opportunity.

Technical Skills

- **Frontend:** HTML, CSS, JavaScript, JQuery , Angular , Bootstrap , Three.JS , GSAP
- **Backend:** PHP , PYTHON
- **Database:** SQL , MySQL
- **Tools & Others:** GitHub Copilot, OpenAI Codex, ChatGPT, AI-assisted debugging & development VS Code, GitHub, Cursor AI ,WordPress.

Projects

- **Solar System Simulation (Three.js + JavaScript)**
Created an interactive 3D Solar System with planetary motion and animations using Three.js.
Result: Improved understanding of 3D graphics, animations, and interactive web visualization.
- **Wizard Form (PHP + SQL + Supabase)**
Multi-step form with sections for profile, personal, academic, and document uploads. Data stored using PHP (SQL operations: INSERT, SELECT) and experimented with Supabase API integration.
Result: Practical understanding of SQL queries and PHP backend basics.
- **E-Commerce Shoe Website (HTM + CSS + JavaScript + PHP + SQL + GSAP)**
Developed a modern e-commerce shoe website featuring product listings, dynamic product detail pages, size selection, quantity management, and cart interactions. Used GitHub Copilot and ChatGPT for faster UI development, debugging, and backend integration.

Result: Gained hands-on experience in DOM manipulation, state handling, animations, browser history API, and building real-world interactive user flows.

➤ **Interactive Website (JS + GSAP + Locomotive Scroll)**

Developed a website using JavaScript libraries with smooth scrolling and creative animations, leveraging GSAP for motion effects and Locomotive Scroll for fluid scrolling experience.

Result: Learned practical use of animation libraries and scroll-based interactions to enhance user experience.

➤ **Countries API Project (HTML + CSS + JS)**

Fetches and displays country data via API calls; dynamically generated flag cards using JavaScript.

Result: Understood API calls, JSON handling, and DOM rendering.

Internship Objective

- **Contribute to building responsive web applications using HTML, CSS, JavaScript, and Angular.**
- **Collaborate with teams to convert design mockups into functional interfaces and improve user experience.**

Certifications

- **JavaScript (Basic)** – HackerRank (2025)
- **SQL (Basic)** – HackerRank(2025)
(<https://www.hackerrank.com/certificates/e7c19c8f326d>)

Education

- **Graduation (B.Tech, Computer Science)** – 2022–2026 | 8.0 CGPA
GH Rasoni University, Nagpur
- **HSC (12th Grade, Science)** – 2022 | 77.6%
Radha Mahavidyalaya, Nagpur
- **SSC (10th Grade)** – 2020 | 70%
Kendriya Vidyalaya, Ajni, Nagpur
